Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 6,8,9,11,31,32,33,34 and 35 are rejected under 35 U.S.C. 102(e) as being anticipated by Im in U.S. Patent No. 6,322,625. Regarding claims 6,8,9 and 11 Im discloses in column 3, lines 39-44 using a first laser light with an effective energy intensity of  $1.0 \text{ J/cm}^2$  and the second laser light striking the back side having an effective energy intensity of 170 to 680  $\text{mJ/cm}^2$ . Regarding claim 31, see figure 1 of Im (see also column 2, lines 59-65). Regarding claim 34, since the claim does not specify that the first laser light is guided onto the top surface of the substrate by considering the first laser light to be the light that reaches the bottom surface of the substrate Im meets all of the limitations of claim 34.

3. Claim 36 is rejected under 35 U.S.C. 102(e) as being anticipated by Kawasaki et al. in U.S. Patent No. 6,426,245 B1. See figure 1 and also figure 3a, which shows a reflection plate (1205) between the substrate and the stage (element 1202).

4. Applicant cannot rely upon the foreign priority papers to overcome this rejection because a translation of said papers has not been made of record in accordance with 37 CFR 1.55. See MPEP § 201.15.

5. The applied reference has some common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 1725

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claim 30 is rejected under 35 U.S.C. 103(a) as being unpatentable over Im in U.S. Patent No. 6,322,625 in view of Iso in U.S. Patent No. 6,087,625. Im discloses in figure 1 all of the limitations of claim 30 except Im discloses using a beam splitter (element 12) instead of a half mirror (see column 2, lines 59-65). Iso teaches that beam splitters and half mirrors are art-recognized equivalents (see column 3, lines 17 and 18). It would have been obvious to adapt Im in view of Iso to provide a half mirror as an art recognized equivalent.

9. Applicant's arguments with respect to claims of record have been considered but are moot in view of the new ground(s) of rejection.

10. Claims 1-5, 12-28 and 29 are allowed.

11. Claims 7 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
